

# RSIC-U

## Base of Wall

### General Notes:

1. RSIC-U to be secured to the subfloor with metal fasteners designed and tested for an installation with 144 pound minimum allowable load per fastener.
2. RSIC-U To be mechanically fastened to the steel track with 4ea framing screws. The framing screw heads to be on the top side of the RSIC-U mounting plate.
3. All voids between the bottom framing member (track) and the structure are to be filled with PAC-FGP and sealed air tight with non-hardening acoustical caulking.
