

## REAL SOLUTIONS IN CONSTRUCTION

Hollman Homes & PAC International eliminate unwanted airborne noise with RSIC-1 clips

### ABOUT THE RESIDENCE

PAC International's RSIC-1 clips were installed in the private residence located in Canby, Oregon. The clips were installed in the primary bedroom to stop the noise from the living room and kitchen area into the main bedroom.

*"PAC suggested the RSIC-1 clips and the owners are happy they made the decision to add the RSIC-1 product."*

*"Customer service was prompt and easy to work with."*

## REAL SOLUTIONS IN CONSTRUCTION

### CHALLENGE/SOLUTION

The owners had concerns about noise getting into the primary bedroom. The desire was to create a separation from the day-to-day, and stopping noise was part of the design.

PAC International's RSIC-1 clips were suggested to solve the noise issue in the family gathering area and Primary Suite. Following discussions about the RSIC clips, it was determined that they would be installed on the wall separating these two spaces. PAC was highly responsive and promptly addressed all of our inquiries. They also ensured that all parties involved knew what was required to complete the job without unnecessary delays.

*We were looking for a quiet enviroment to escape at the end of a long work day.*

*ThE PAC RSIC clips gave us that much needed peace.*
